According to the Continuous Mortality Investigation, life expectancy for a year-old man has declined from an anticipated 43 years of extra life to 42, for a year-old woman from These data are new and are not fully understood yet, but it seems pretty clear that the decline is linked to austerity, perhaps not so much to Principles of Terahertz Time-Domain Spectroscopy: An Introductory Textbook squeeze on NHS spending - though the longest spending squeeze, adjusted for inflation and demographics, since the foundation of the NHS has obviously had some effect - but to the impacts of austerity on social services, which in the case of such services as Meals on Wheels and house visits function as an early warning system for illness among the elderly. I do not know where I would be without this book, seriously.
